

Agentic Commerce on Arc

AI Agents That Shop, Create, and Trade for You

"In a world where AI makes labor and intelligence abundant, creativity and proving you had the idea first become the true differentiators."

The Vision

- Natural Language Product Creation - Describe your dream product in plain English
- AI-Generated Images - FLUX creates photorealistic product images instantly
- NFT Ownership Proof - Mint on Arc blockchain to prove creative priority
- Stablecoin Payments - Circle USDC integration for seamless commerce

100% Vibe Coded

This entire project was built through pure AI collaboration:

- Architecture decisions via natural language dialogue
- React/TypeScript components generated by AI agents
- Smart contracts deployed through AI assistance
- Testing and debugging with AI pair programming
- Even this video was programmatically generated with Remotion

No traditional coding. Just creative direction and AI execution.

Tech Stack & Roadmap

React 18 | TypeScript | Vite | Solidity | Arc Blockchain | FLUX/Replicate | Circle USDC | Remotion | Railway

The Roadmap:

- TODAY: AI-generated product images with NFT minting
- TOMORROW: AI-generated music tracks with provable timestamps
- FUTURE: 3D scans, fashion designs, architectural concepts

Try It Now
